Professional Summary

AI Product Manager and NextLeap **Top PM** Fellow with a strong technical foundation in backend systems, AI API integrations, user-centric product thinking, and data-driven problem solving. Experienced in building scalable applications using Spring Boot, REST APIs, MySQL, ReactJS, and Claude APIs. Published researcher with experience analyzing large-scale datasets, improving algorithmic pipelines, and communicating complex technical concepts to cross-functional stakeholders. Seeking role focused on building intelligent, scalable, & user-impact-driven products.

Product & Technical Skills

- **Product Management:** User Research, Problem Framing, PRDs, Product Strategy, Roadmapping, Prioritization, User Stories, Wireframing, MVP Definition, Agile/Scrum
- **AI Product Skills:** AI Use Case Discovery, Prompt Engineering, Claude API Integration, AI Workflow Design, Human-in-the-Loop Product Thinking, Evaluation Metrics
- **Metrics & Analytics:** Funnel Thinking, Activation, Retention, Engagement Metrics, Success Metrics, Experimentation, Data-Backed Decision Making
- **Technical Skills:** C++, Python, SQL, Spring Boot, REST APIs, Microservices, ReactJS, Node.js, Git/GitHub
- **Core Strengths:** System Design, API Design, Technical Communication, Cross-Functional Collaboration

Professional Experience

Research Intern

Jan 2025 – July 2025

UiT The Arctic University of Norway

Tromsø, Norway

- Developed computational image processing pipeline integrating **AutoSAFT framework** with **Block-Matching 4D (BM4D)** filtering algorithms, **improving signal-to-noise ratio by 40%** for 4D acoustic reconstruction
- Processed and analyzed **large-scale time-series datasets (10GB+)** using Python with NumPy and SciPy, implementing data transformation workflows for computational efficiency
- Published **peer-reviewed research in Journal of Microscopy**, demonstrating technical writing, research methodology, and ability to communicate complex technical concepts to stakeholders
- Collaborated with international research team, applying Agile methodologies to deliver project milestones on schedule

AI & Technical Projects

Trust Lens Prototyping for ChatGPT: AI Output Evaluation Experience | AI Product, User Research, UX, Metrics

- Built a product case study for a **Trust Lens** in ChatGPT to help users evaluate AI outputs are correct, complete, well-reasoned, useful, and appropriately uncertain before acting on them.
- Conducted mixed-method research with **40+ survey responses and 6 user interviews**; identified that **71.0%** of users had low confidence judging AI output quality when they were not domain experts.
- Defined the core problem as the gap between **perceived quality and actual output quality**, where polished AI responses create over-trust and make missing context, assumptions, and weak reasoning harder to detect.
- Designed the solution flow covering **Prompt Readiness Check, Answer Direction Preview, Trust Lens Output Review, Claim Recheck, source grounding, and final user decision actions**.
- Prioritized solutions using the **Impact-Confidence-Effort framework**; selected **Trust Lens+ Recheck** as highest-priority.
- Defined success metrics including **Evaluated Output Reuse Rate** as the North Star Metric, with leading indicators for Trust Lens Review Rate, Prompt Readiness Engagement, Claim Review Rate, and Recheck Usage Rate.

RAG-Based Mutual Fund FAQ Chatbot for IndMoney | RAG, Retrieval, Guardrails, FinTech

- Built a facts-only RAG assistant for mutual fund FAQs using **25+ official AMC, AMFI, SEBI, KIM, SID, factsheet, and service-page sources**.
- Designed a retrieval-first flow: **ingest → clean → chunk → embed → retrieve → grounded response**, reducing hallucination risk for financial queries.
- Defined product guardrails including citation-first answers, refusal logic for investment advice/performance predictions, and PII protection for PAN, Aadhaar, OTP, folio, email, and phone inputs.

Education

Birla Institute of Technology (BIT), Mesra

Expected: May 2026

Bachelor of Technology in Mechanical Engineering

Ranchi, India

Relevant Coursework (Self-Study): Data Structures & Algorithms, Object-Oriented Programming (Java), Database Management Systems (DBMS), Operating Systems, Computer Networks

NextLeap Product Management Fellowship

Feb 2026 – May 2026

Product Management Fundamentals, User Research, Product Metrics & Analytics

Remote

Publications & Achievements

- **Published Author:** "Extended Depth Acoustic Imaging with AutoSAFT and Block-Matching 4D Filtering," *Journal of Microscopy*, 2025 – [ResearchGate](#)
